PROFESSIONAL SUMMARY

- Software Engineer and workflow automation specialist with experience building production AI systems, desktop applications, and agentic workflows.
- Adept at full-stack development, integrating custom AI pipelines (RAG, multi-agent frameworks), and streamlining business operations.
- Strong background in object-oriented programming, custom automation (n8n), and deploying end-to-end user-centric software solutions.

EDUCATION

National University of Computer and Emerging Sciences (Fast-NUCES)

Lahore, Pakistan

BS in Computer Science

SKILLS SUMMARY

Programming Languages: Python, C++, JavaScript, TypeScript

Web & Desktop Development: FastAPI, Next.js, React.js, Tkinter, CustomTkinter, SFML

AI & Automation: n8n, Groq API, Gemini API, Ollama, Meta Business API, RAG, ChromaDB, LLMs, Fast-Whisper

Databases & Tools: Supabase, Git, OpenCV, FFmpeg, ReportLab, PyPDF

Design & Media: Graphic Designing, Video Editing, Social Media Marketing

WORK EXPERIENCE

Software Engineer & SMMA Manager, Sleek Solar International (Pvt) Ltd

sleeksolar.com | Lahore, Pakistan

- Engineered and deployed automated customer service WhatsApp chatbot using n8n and the Meta Business API for business inquiries.
- Built comprehensive desktop quotation application using Python, Tkinter, PyPDF, and ReportLab to automate commercial solar proposals.
- Integrated Large Language Models to automate document parsing and response generation, ensuring secure API key management.
- Currently handling full Social Media Marketing Agency (SMMA) services, directing digital presence, content strategy, and lead generation.

LEADERSHIP & SOCIAL MEDIA PRESENCE

Digital Content Creator

[instagram.com/ibrahimatfast](https://www.instagram.com/ibrahimatfast)

- Consistently produce and publish engaging multimedia content across all major social media platforms.
- Leverage SMMA strategies and graphic design expertise to build audience engagement and establish strong brand identities.

PROJECTS

Unilens

[App Link](#)

- Developed a specialized application focusing on seamless user integration and optimized performance.
- Implemented robust backend processing and intuitive user interfaces to solve real-world engagement problems.
- **Tech Stack:** Python, Web Technologies

AI Clipping Tool

[App Link](#)

- Developed an AI-powered media extraction agent utilizing Fast-Whisper for high-speed, accurate video transcription.
- Integrated Large Language Models and RAG architecture via API to intelligently identify and extract viral video segments.
- **Tech Stack:** Python, LLM, RAG, API, Fast-Whisper

Sleek Solar WhatsApp Bot

[App Link](#)

- Built an automated WhatsApp chatbot handling business inquiries natively through the Meta Business API.
- Designed conversational flows and automated lead processing natively tailored for solar equipment inquiries.
- **Tech Stack:** n8n, Meta Business API, Python

Barq Local Voice-Assisted AI

[App Link](#)

- Developed an end-to-end voice AI assistant integrating local speech processing to handle natural language queries.
- Built the backend logic using Python and FastAPI, connected to a dynamic, animated frontend.
- **Tech Stack:** Python, FastAPI, Next.js, Framer Motion

AI-Powered RAG Document Processing System

[App Link](#)

- Constructed a Retrieval-Augmented Generation pipeline using FastAPI to process and analyze complex documents.
- Integrated ChromaDB for highly efficient vector search and data retrieval, enabling real-time context-aware querying.
- **Tech Stack:** FastAPI, ChromaDB, Python, RAG

Gmail Auto-Categorization Engine

[App Link](#)

- Scripted a Python-based automation tool to monitor unread emails and apply organizational classifications via the Groq API.
- **Tools:** Python, Groq API, LLM
